

Faculty	5
Course Title	Aircraft Systems and Components
Number of ECTS credits	6
Hours per week (SWS)	4
Semester	Fall/winter: Master
Course objective	<i>The students become acquainted with the different systems and components of an aircraft, which are necessary for its operation, as well as their integration into the overall system. In particular the various concepts and their advantages or disadvantages will be discussed. After successful completion of this course the students are able to select appropriate systems and components and integrate them into an overall system.</i>
Prerequisites	
Recommended reading
